To whom it may concern,

I have been working with Cutting Edge Technology and Ben Shepherd (CEO) for several weeks now. I have had the opportunity to use the CUTET 100 myself and demonstrate it to groundworkers and sight crew during a series of Tool Box Talks run by Brandon Hire. The tool box talks are designed to introduce new products on the market to our major account customers.

I have been in the hire trade for some twenty five years and suggest that this product is one of the most exciting I have seen. At the Tool Box Talks there is always considerable interest in the CUTET 110. My colleagues and I are of the opinion that there is a tremendous opportunity for this product. We are looking to promote the product through our monthly mail shot to customers as well as have the CUTET 110 feature in our 2010 catalogue.

Whilst there are always constructive suggestions regarding new products, especially one that is such a new concept, we have found nothing to report that cannot be readily dealt with by the Cutting Edge Technology technical team.

In short, I thoroughly recommend the CUTET 110 and offer Cutting Edge Technology and anyone associated with the product, our endorsement.

Yours Sincerely
